

New Correctional Facility for Women Construction Update November 18, 2016

We have completed construction week #33 of the new Correctional Facility for Women in Concord; we continue to be on schedule and within budget. This week Strescon Limited began the installation of insulated exterior wall panels as seen in the picture below. The wall assembly also provides a fire rating that exceeds three hours. The panels saved time beyond offering a fast erection schedule, as they also offered a durable interior surface and an attractive façade without having multiple trades involved.

On November 22, 2016 there will be some traffic pattern changes behind the Men's Prison soft ball field as the contractor lays additional base course asphalt. The temporary parking areas will still be accessible and the pavement can be driven on shortly after it's laid down.
